| Abstract | <p>Focusing on children with the developmental disabilities and their parents, the professional staff, the student volunteers and school officials have got together and shared the information for the children who need support in daily life and the relevant information.</p> <p>As a result of this activity, it has brought the effect of counseling assistance by expert staff as well as opportunity for the parents to learn from each other and promoted communication between the parents and school officials.</p> <p>In this report, from the observation of the example of the past activities and questionnaire filled by the parents, it leads to the point that when it comes to the collaboration between the parents and the community such as school, we should try to build common recognition while those concerned take care of children and come up with the idea that can achieve everybody's consensus. It also made it clear that it is important to have confidence through the various values and experience promoted by the interaction between them.</p> |
