Abstract	This study is the practice study that I compiled about the activity that I carried out in cooperation with community. The contents of the activity are divided into day care and an event, and students come to participate in both by all means. As a result of having analyzed it mainly on the self-evaluation of the student about an achievement degree, through an experience of an event and the day care for infants, they were able to notice about importance of the childcare. Students were not able to show learning of practical training for childcare and teacher education by this action enough. However, this action as the practice of practice understood that functioned.
keyword	practical training for childcare and teacher education, cooperation of community :
