Title	Case Study of a Junior High School Student from the Martial Arts Club Suffering from Traumatic Experience and sought Consultation due to His Mother's Illness
Author	AKAGAWA Chikara
Affiliation	Nagasaki St. Nova Hospital
Abstract	<p>This is a case study of a junior high school student belonging to the martial arts club, who visited the school counselor for consultation due to his mother's illness. This case study is not a case of psychological support for athletes but is a case connected to the psychological support for clients who became athletes as a result. In the study, the problem of the mother's illness, problems with the club advisor, and the traumatic experience when he was a sixth grader in elementary school were examined. Moreover, as a Word Association Test was conducted twice in this study, changes in the response words of the Word Association Test.</p>
keyword	traumatic experience, guilt, athlete, Word association test
