Title	Factor Analysis of Prolonged Aging about Hikikomori : Analysis of Free Description by Text Mining
Author	Youichi Yakabe
Affiliation	Nishikyushu University Graduate school of Human Care Sciences
Abstract	This study aims to investigate the factors of prolonged aging of hikikomori based on the free descriptions of supporters. We requested the 404 support organization by mail, 244 people (12.1%) responded. The free descriptions were analyzed using text mining. Three appearance patterns were identified through the co-occurrence network, Addition, correspondence analysis confirmed, two characteristic patterns. Two aspects of hikikomori were considered personal and social factors.
keyword	Hikikomori , Prolonged aging , Free description , Text mining
