Title	Teaching Methods in Physical Education Theory — Understanding Anti-Doping —
Author	Yoshiaki Kondo
Affiliation	Department of Sports Health and Social Welfare, Faculty of Health and Social Welfare Sciences, Nishikyushu University
Abstract	This paper examines teaching methods to deepen understanding of anti-doping in the educational field of health and physical education. While understanding the history of sports, its cultural characteristics, and the characteristics of modern sports in the subject of health and physical education, the importance of developing a correct understanding of doping, which violates the spirit of fair play, an inherent value of sports, is demonstrated.
keyword	Anti-doping ,Physical education
