Title	Alternative practicum for geriatric nursing using online systems during the COVID-19 Pandemic: A literature review
Author	Seita KUZUHARA
Affiliation	Nishikyusyu University, Faculty of Nursing Sciences
Abstract	<p>This study aimed to identify the experiences and challenges associated with alternative methods for practicum in geriatric nursing reported in the three-year period between 2020 and 2023 during the COVID-19 pandemic, and to obtain hints for similar instances in the future. Our study revealed that a certain degree of learning was achieved through the various practicums. However, more effective learning in online practicum in geriatric nursing would require not only students' effort, but also better teaching skills in the part of teachers, such as in individual instruction and alternative methods of reflection.</p>
keyword	corona disaster, online, gerontological Nursing, alternative practice
