Abstract	This study aims to clarify the view of children described in “Revisions of the Course of Study for Elementary Schools: Arts and Crafts Edition,” versions Heisei 20 and Heisei 29. In this study, the authors used the qualitative KJ method of analysis to categorize the view of children, dividing them into eight categories: friendship relation, language activity, materials and tools, relationship to own experience, skills, curiosity and motivation, relationship to target, and thinking process. In the discussion, we compare the contents of the lower grades, middle school years, and senior year in each view of children, and showed the differences in written content according to development.
keyword	view of children, view of pupils, arts and crafts, revisions of the courses of study for elementary schools arts and crafts edition
