Abstract	In this study, based on the Special Needs Education Expertise Scale (Hino et al., 2019), we planned and implemented a "Special Needs Education Expertise Enhancement Training" consisting of four sessions on "Understanding Children, Guiding Children, Supporting Children, and Supporting Children. Each session consisted of three parts: (1) pre-training using web-based materials, (2) on-the-day training including exercises, and (3) post-training learning by the participants themselves. Participants were highly satisfied with the training, suggesting that the scale of the training should be expanded in the future.
keyword	・特別支援教育の専門性 ・研修プログラム ・特別支援教育担当教員 ・特別支援教育専門性尺度 specialty in special education, training programs, teachers in charge of special needs education, special needs education expertise scale
