Abstract	<p>Children with developmental disorders may lack life experiences due to their characteristics. Accumulation of daily experiences leads to self-affirming and self-esteem. Therefore, the lack of experience is serious problems for children.</p> <p>This study surveyed guardians of children with developmental disorders about their children's life experiences in the COVID-19 disaster. We compared daily life experiences that were lacking with those that were lacking due to the COVID-19 disaster.</p> <p>Based on these results of this survey, we discussed livelihood guarantees that will be needed in the future.</p>
keyword	developmental disorder COVID-19 disaster livelihood guarantee experience disparity
