Abstract be able to integrate into the new lifestyle and may become withdrawn. In such cases, active acceptance by the hosting so could be one solution. Although the hosting government claims promote relocation, it does not provide information on earneighborhood association, and it is up to the hosting residents respond. In this presentation, I used the example of Hirado Care.	Affiliation	Beppu University	
	Abstract	When elderly people move to CCRC or another method, they may not be able to integrate into the new lifestyle and may become withdrawn. In such cases, active acceptance by the hosting side could be one solution. Although the hosting government claims to promote relocation, it does not provide information on each neighborhood association, and it is up to the hosting residents to respond. In this presentation, I used the example of Hirado City, Nagasaki Prefecture, as supporting evidence to inductively demonstrate the necessity of acceptance based on the understanding of everyday life in folklore studies.
