Abstract In the taxonomy of the educational goals, it is shown at the education in stitutions, shared standard indicators on the learning outcomes are not clarified, considering the qualification requirements in the course. In addition, in the junior college classified as higher education institutions for associate degree, it is important to properly set the standard goals, considering the differences from bachelor awarding universities and the intermeability. In 'Junior College Consortium Kyushu (JCCK)' of the seven junior colleges, we considered the "JCCK Standard" for the common models of learning outcomes for minvestigation of the diploma policy, through the app	和文	
所属 西九州大学短期大学拖城杂らい学科 ³ , 滋慶医療科学大学院大学 ⁴ 度文 Title Investigation of the Common Learning Outcomes for Junior College Consortium Kyushu (JCCK) Commonality of the Course-Level Learning Outcomes Related to the Diploma Policies of the Seven Junior Colleges Author Koji Hirata Emiko Abe Toshiharu Yabu Keiichi Yoshimoto Affiliation Local Life Support Sciences, Nishikyushu University Junior College ¹ . Nagasaki Junior College ² , Saga Women's Junior College ⁸ . Jikei University of Health Care Sciences ⁴ . In the taxonomy of the educational goals, it is shown at the educational stage based on the Fundamental Law of Education. However, in higher education institutions, shared standard indicators on the learning outcomes are not clarified, considering the dualification requirements in the course. In addition, in the junior college classified as higher education institutions for associate degree, it is important to properly set the standard goals, considering the differences from bachelor awarding universities and the international permeability. In 'Junior College Consortium Kyushu (JCCK)' of the seven junior colleges, we considered the "JCCK Standard" for the common models of learning outcomes from investigation of the diploma policy, through the approaches of text mining method. The childcare courses and the 'careers in general' course were investigated to tune and edit the JCCK Standards. The former is specialized in professional training of the qualification requirements, the latter is not specialized in the qualification of document terms, and the latter were able to show a direction of the goals, although it is roughly since the wide variations by each institution.(Hirata)	表題
