Abstract	<p>The United Kingdom is a leader in support for children with disabilities and in pediatric nursing. Through an online inspection of Beyond Autism located in south London, we realized the high level of specialization in support for children with disabilities in the UK. In regard to support for children attending Beyond Autism and their families and daily living support, we were able to identify common issues as well as points that can be incorporated in Japan despite its healthcare system being different from the UK. Furthermore, it was an opportunity to develop a deeper understanding about professional roles.</p>
keyword	United Kingdom , support for children with disabilities , Special Educational Needs(SEN)
