Abstract	<p>The 63rd Study Conference of National Association of Public School Vice Principals was held on the web at August 2021. The Conference has 3 principles, "Representative participation", "Participatory", "Openness". For representative participation system, each group included participants from each district. When the web meeting, an email address as a Zoom account was required for intentional group composition. There were many cases where the Zoom account could not be registered on the PC used by the teacher for work. There are 2 main reasons. 1) The school board does not allow teacher to use the official email address for register a Zoom account. 2) Due to PC settings, clicking the registration link in the body of the email from Zoom does not connect the link. Even if Teacher could register a Zoom account, there are some cases where the PC that the teacher was using for work has not a microphone or camera. And above all, the network capacity was sometimes poor to use the web conferencing system.</p>
