Abstract	<p><i>Objective</i>: To clarify the characteristics from the actual situation of fathers and mothers' sex education to adolescent children.</p> <p><i>Methods</i>: We extracted target literature the keywords "adolescence", "family" and "sex education" from medicine central journal etc from 1986 to 2015, and analyzed the contents of parent sex education in each angles, "knowledge", "attitudes" and "practice". Subjects of reserches are parents in the literature.</p> <p><i>Results</i>: 22 in which subjects of reserches are parents out of 62 cases were acquired for parents. About knowledge of sex, fathers learned naturally, mothers gained wide information from magazines etc. In attitudes to children, the case in which fathers teach is 3% and the case in which mothers teach is 55%. In the practice of sex education for children, the father's sex education implementation rate for elementary and junior high school students was 10.1%. And the intervention rate after receiving consultation from children in the higher grades of elementary school was 84.1% for girls, which was about six times rate for boys. On the other hand, the mother's sex education implementation rate was 61.6%. 58.1% of mothers said they were not confident of teaching boys.</p> <p><i>Conclusion</i>: The will to implement sex education of the father was low. The mother did not have confidence in sex education of the boys.</p>
keyword	Adolescence, Family, Sex education, Actual situation
