Title	Crisis of Children's Association Activities in the Community ～Survey of community leaders on child-raising～
Author	Keiko Katoda
Affiliation	Nishikyusyu University Faculty of Health and Social Welfare Science (Yamaguchi Prefectural University)
Abstract	<p>The sustainability of organized children's association activities in the community is jeopardy.</p> <p>In order to grasp the actual situation and find clues to solving the problem, I conducted two surveys on the current awareness and problem consciousness of local fosters who support children's association activities.</p> <p>(A) Semi-structured interviews by the researcher targeting the chairpersons of municipal children's association federations (11 persons)</p> <p>(B) Questionnaire survey on activities and awareness of unit children's associations targeting unit children's association fostering chairpersons (876 persons)</p> <p>As leaders and local leaders, they are aware of the appeal of local children's association activities, which they have experienced themselves, and of the good educational opportunities for fostering children's social skills through play in different age groups.</p> <p>However, in recent years, the busy schedules of both adults and children have made these activities a low priority for families raising children, and this is an ambivalent situation. Their sense of frustration and helplessness emerged.</p>
keyword	Children's Association Activities, Community, Community Education Capability,
